

EXPLORE THE EXCELLENCE OF TRUE NEEDS

"where construction meets conscientious craftsmanship"

TRUE NEEDS

SUSTAINABLE DEVELOPERS

"TRULY BUILT"

WHO WE ARE ?

Welcome to True Needs Sustainable Developers Pvt. Ltd., Where our commitment to excellence meets a passion for sustainability. As a distinguished construction company, we blend innovation with integrity to redefine the landscape of sustainable development. With a foundation built on core values, we take pride in transforming ideas into structures that not only stand the test of time but also contribute to a greener, more resilient future. Explore the essence of True Needs, where construction meets conscientious craftsmanship."

OUR VISION

At True Needs Sustainable Developers Pvt. Ltd., Our vision is to pioneer a paradigm shift in the construction industry, reimagining urban spaces through innovative and sustainable practices. We aspire to be a beacon of excellence, leading the way in creating structures that not only withstand the passage of time but also harmonize with the environment. Our vision extends beyond bricks and mortar; we aim to inspire a future where every construction project is a testament to environmental responsibility, cutting-edge design, and enduring quality. True Needs envisions a world where sustainable development is the cornerstone of progress, shaping a better, more resilient tomorrow."

OUR MISSION

At True Needs Sustainable Developers Pvt. Ltd., Our mission is to revolutionize the construction landscape by seamlessly integrating sustainability into every facet of our work. Committed to delivering unparalleled quality, we strive to create spaces that not only meet the present needs but also contribute positively to the future. Our mission is rooted in a dedication to eco-conscious practices, cutting-edge innovation, and client satisfaction. True to our name, we seek to be the catalysts for positive change, setting new standards in the industry and building a legacy of sustainable development that stands as a testament to our unwavering commitment to the planet and its inhabitants."

OUR VALUES

At True Needs Sustainable Developers Pvt. Ltd., our values form the bedrock of our identity, guiding every decision and action we take. We are defined by:

SUSTAINABILITY:

We are unwavering in our commitment to environmentally responsible practices, integrating sustainable solutions into every project to minimize our ecological footprint.

INTEGRITY:

Our foundation is built on honesty, transparency, and ethical conduct. We prioritize integrity in all our interactions, ensuring trust and respect with clients, partners, and stakeholders.

INNOVATION:

Embracing forward-thinking and cutting-edge technologies, we strive to pioneer innovative solutions that redefine industry standards and push the boundaries of what is possible in construction.

EXCELLENCE:

We relentlessly pursue excellence in craftsmanship and project execution. From concept to completion, we aim for the highest standards of quality and precision in every endeavor.

CLIENT-CENTRIC APPROACH:

Our clients are at the heart of everything we do. We prioritize understanding their needs, delivering personalized solutions, and exceeding expectations to foster long-term relationships.

TEAM COLLABORATION:

We foster a culture of collaboration and teamwork, recognizing that the collective expertise of our diverse team is key to overcoming challenges and achieving success.

COMMUNITY IMPACT:

Beyond construction, we actively contribute to the well-being of the communities we serve. We believe in giving back and creating a positive impact on society.

These values shape True Needs Sustainable Developers Pvt. Ltd. into more than a construction company; they embody our commitment to building a sustainable, ethical, and impactful future."

where sustainability meets structure

SERVICE OFFERED

- Backyard cultivation
- Fruit homestead
- Spice homestead

TRUE NEEDS SUSTAINABLE HOME

Welcome to True Green Homes, where sustainability meets serenity. Our dream project envisions residences on a minimum of 20 cents of land, seamlessly integrating nature into everyday living. Each home comes with a flourishing fruits garden, organic vegetable patches, a curated garden, and cleaning services. Immerse yourself in the essence of green living with coconut trees, a jackfruit tree, and a mango tree, creating a lush canopy around your home. Our commitment to holistic living extends to Ayurvedic medicinal plants, fostering wellbeing within the community.

Water conservation takes center stage with rainwater storage and underground water recharging systems, ensuring a self-sufficient and eco-friendly water supply. Embrace renewable energy through solar panels, contributing to a sustainable future.

A dedicated playground offers a space for recreation, while a greenhouse invites residents to cultivate their green thumb. True Green Homes goes beyond mere housing; it is a platform for organic cultivation awareness classes, fostering a community connected to the earth and each other. Welcome home to a greener, healthier tomorrow.

Solar Energy Utilization: Installing solar panels on your roof to harness clean and renewable energy for powering your home, and arranging the system for solar charging system for ev.

Water Conservation: Implementation of water-saving fixtures, fix leaks promptly, and consider rainwater harvesting systems to optimize water usage.

Natural Ventilation: Designing home to maximize natural ventilation, reducing the need for artificial cooling systems.

Green Landscaping: Planting native and drought-resistant vegetation in your garden to conserve water and support local biodiversity. Some of the best trees to plant in Kerala for shade include the coconut palm, banyan tree, neem tree, jackfruit tree, and mango tree. These trees are well-suited to Kerala's tropical climate and can provide ample shade to protect from the hot sun.

Energy-Efficient Lighting: Switching to LED or energy-efficient light bulbs to reduce electricity consumption and extend the lifespan of your lighting fixtures.

Home Automation: Fixing smart home systems to control lighting, heating, and cooling remotely, ensuring efficient energy use.

Composting System: Setting up a composting system for kitchen waste to create nutrient-rich soil for your garden.

Indoor Plants: Incorporating indoor plants to improve air quality and add a touch of nature to your home.

Natural Air Purifiers: Using indoor plants like snake plants, spider plants, and peace lilies to naturally purify the air in your home.

Natural Pest Control Plants: Planting herbs like basil, mint, or lavender that naturally repel pests, reducing the need for chemical pesticides.

Green Roof or Garden: Adding a green roof or rooftop garden to improve insulation, absorb rainwater, and create a habitat for local wildlife.

Living Walls: Integrating living walls or vertical gardens into the architecture to enhance indoor air quality, provide insulation, and contribute to biodiversity.

Eco-Friendly Play Areas: Designing outdoor play areas using sustainable materials, considering natural elements like logs and stones to create an eco-friendly and engaging space for children.

Natural Swimming Pools: Choosing natural swimming pool design that uses plants and biological filters instead of chemicals, promoting a healthier ecosystem. We will provide free cycles for clients of our sustainable home. We will consider their health too.

Our sustainable home includes 10 years of deep cleaning services, and 1 year will be free of charge for our true clients. The balance will be charged. Deep cleaning services are held twice per year. A sustainable home integrating a library and promoting cycling aligns with holistic well-being and eco-conscious living. The library fosters knowledge and community engagement, encouraging intellectual growth. Cycling promotion contributes to a healthier lifestyle and reduces environmental impact. Together, these elements create a harmonious living space, blending intellectual enrichment with eco-friendly practices for a truly sustainable lifestyle.
